Revised 02/2016

Julius Everett Marsh, Sr.

Reid Marsh, Jim Marsh Sr.,
Mollie Marsh Brugh

Mollie Marsh Brugh

In 1906, Julius Everett Marsh, Sr. founded Marsh Furniture Company. From his one-room shop in High Point, North Carolina Marsh and his crew of skilled carpenters crafted functional and decorative furniture for the kitchen at a time when the “kitchen cabinet” was relatively unknown. Today, Marsh Furniture has developed and expanded our offerings, providing quality cabinets featuring popular materials, styles, finishes, and accessories.

HAND-CRAFTED IN THE FURNITURE CAPITAL OF THE WORLD

Over the last century, Marsh has produced quality products at an exceptional value. Located in High Point, North Carolina Marsh builds on the tradition of making quality furniture for the kitchen and bath. For generations, Marsh employees have produced quality kitchen and bath cabinets at a competitive price. From the selection of the wood to the finishing process, we are committed to building products that meet and exceed your expectations. We pride ourselves on being American made.

This Jamestown 1 Maple Linen with Graphite Maple island creates a welcoming space. Using a neutral palette, clean cabinet lines, and small embellishments, this popular design type bridges tradition and contemporary styles to create a space that is familiar, current, and highly functional.

Summerfield 1 Greystone

Create your own bathroom retreat. Designed to fit virtually all areas, you can make this room your own. Marsh cabinets provide beauty, functionality, and organization to your bathroom.

Cambridge Oak Espresso

Summerfield 1 Maple Alpine

This Jamestown 1 Maple Linen kitchen with Espresso island combines the clean lines and functionality of modern design with a traditional personality. This kitchen design combines current trends, colors, and materials to create a look that is very fresh and “now,” while maintaining an uncluttered and open feel.

Wilmington 1 Maple Linen

Trenton 3 Cherry Wheat with Chocolate Glaze and Onyx island

Apex Maple Tuscany

This Arlington 1 Maple Linen with Chocolate Glaze provides a custom look that compliments the tones of the countertop and back splash. The glaze emphasizes the details of the decorative raised panel.

WOOD SPECIES

Cherry

Cherry is a moderately hard wood, heavy and strong with red undertones. As cherry ages, it will darken. Cherry is one of the most desirable woods on the market today. It may range in color from a light to dark reddish-brown. These variations are often quite visible with natural or light finishes, while appearing less on darker stains. This is the natural beauty of the wood and should not be considered a defect.

Maple

Maple is a hard and dense wood with a closed grain that is relatively subtle in appearance, giving it uniformity in its texture. Maple resists indentation and abrasion. Because of its uniformity and hardness, maple makes an excellent wood to paint as well as stain. The color range runs from white to yellow to brown. When a light finish is applied, these variations are visible and should not be considered defects.

Oak

Oak is an extremely hard wood with an open grain. The grain pattern may vary from a tight to wide pattern with coarse texture. In its natural state, colors may range from brownish with a red tinge to light yellow. Variations in tone are more visible with lighter finishes and should not be considered a defect.

Birch

Birch is a medium-hard wood with plain and closed grain. The grain is often characterized as a curly or wavy pattern. It is predominately a light yellow wood that takes stain very well. When a finish is applied, the wavy and curly grain absorbs stain and reflects light in such a manner as to enhance the actual characteristics of the species and should not be considered a defect.

Thermofoil

Thermofoil is a Medium Density Fiberboard(MDF) covered with durable thermofoil laminate. The maple wood frame is painted with a white paint to closely match the laminate. You may notice some small seams in the paint at the joints of the cabinetry face frame due to expansion and contraction of the wood. This will not affect the integrity of the cabinet or the finish and should not be considered a defect.
